

The mission of the National Medical Association is to promote the science and art of medicine. The association also acts to influence society and its institutions, to encourage, to protect, and to promote the betterment of the public health and quality of life for individuals and families.

While throughout its history the National Medical Association has focused primarily on health issues related to African Americans and medically underserved populations, its principles, goals, initiatives and philosophy encompass all sectors of the population.

This roster has been organized to help you quickly find the physician of your choice in the Indianapolis community. A healthier life can be achieved with regular preventive care.
