

Innovative Clinical Concepts, LLC is a Site Management Organization (SMO) that specializes in phase II through phase IV outpatient clinical trials involving pharmaceuticals, biologicals, implants, and other medical device products.

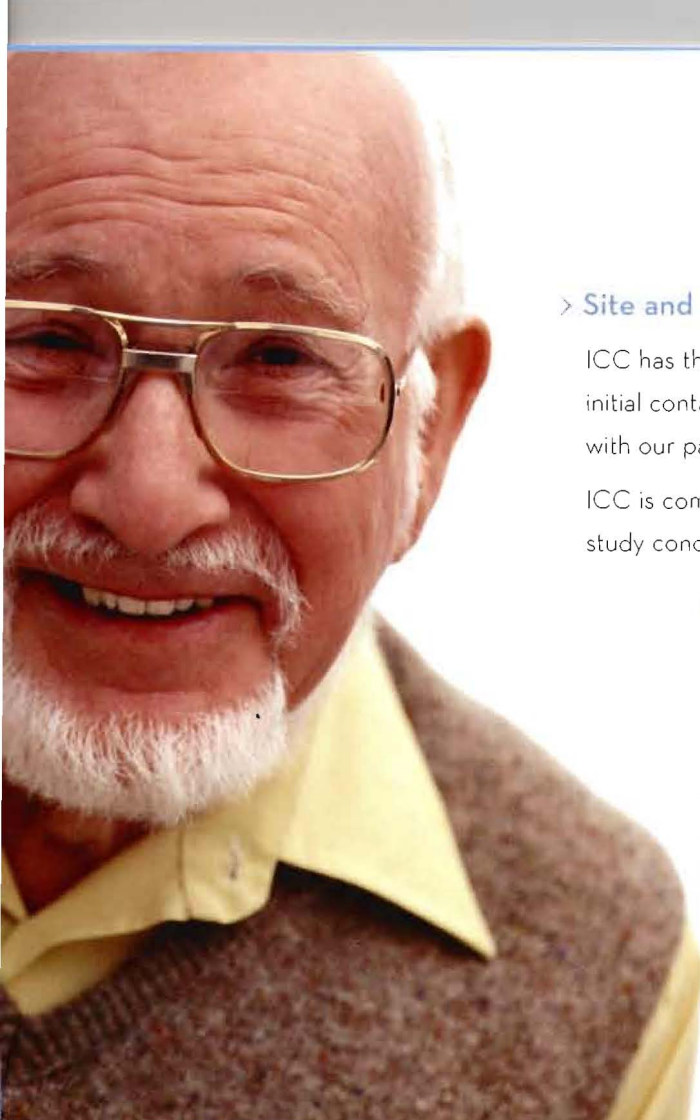

› **Our Experience**

We have over 100 years of combined experience in the medical, pharmaceutical and related industries, including leadership positions in major corporations.

ICC's mission is to provide high quality, efficient, and ethical clinical trial support in the conduct of clinical research.

ICC's partnership with our investigator network provides access to all patient populations. This includes special patient groups, minority groups and other under-represented groups.

> Site and Study Management

ICC has the capability of selecting and managing single, as well as multiple sites from initial contact through study closeout. ICC performs site monitoring of studies contracted with our partner investigators based on the requirements of the sponsor.

ICC is committed to providing sponsors with quality and accurate data that support the study conclusions.

ICC's expertise includes:

- Site selection
- Investigator and staff training
- Site initiation
- Patient/subject recruitment
- Budget management
- Data management
- Study drug management
- Site monitoring
- Study closeout
- Regulatory
- Project management
- Quality assurance

› **Recruitment:** *Your National Connection*

ICC offers a diverse investigator network that represents a talent pool of board certified physicians. ICC's close working relationship with our investigators ensures exclusive investigator and professional staff training in all aspects of the clinical trial process. This includes training in FDA requirements and compliance with all applicable HIPAA and GCP guidelines.

> Your Research Partner

ICC partners with pharmaceutical companies, device manufacturers, and Contract Research Organizations (CROs) to coordinate and manage all clinical study activities. At ICC, we partner with investigators in all specialties, providing quick response to the needs and requirements of the sponsor organization.

Our network of investigators has expertise in the following therapeutic areas:

Hypertension	Medical devices
Diabetes	Orthopedics
Heart disease	Infectious diseases
Depression	Obesity/Hyperlipidemia
G I disease	Osteoporosis
Renal disease	Asthma

ICC has experience conducting drug interaction trials and phase II through phase IV clinical trials.
